

Safety Pop-off Valve Cap

This device allows the use of a mechanical ventilator with our patented safety pop-off valve.

The safety pop-off valve, by design, is always open. As shown here, once installed, the cap seals the safety pop-off valve for use with ventilators.

Features:

- For safety, clearly marked:
“Remove for Non-Ventilator Use”
- Large, easy to handle size
- Stainless steel chain to prevent loss

Order part number ACC312

Remove the cap for use without a ventilator.
